PO-Competency-Performance Indicator

PO	Competency	Performance Indicator
PO 1 Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialisation for the solution of complex engineering problems	1.1 Demonstrate competence in **mathematical** modelling	**PI 1.1.1 Remembering**: Recall key mathematical formulas and concepts relevant to engineering problems.
		PI 1.1.2 Understanding: Explain how mathematical models are used to represent engineering systems or processes.
		PI 1.1.3 Applying: Solve engineering problems by applying appropriate mathematical models and methods.
		PI 1.1.4 Analyzing: Break down a complex engineering problem into mathematical components to evaluate relationships.
		PI 1.1.6 Creating: Develop new mathematical models for innovative solutions to engineering challenges.
	1.2 Demonstrate competence in **basic sciences**	**PI 1.2.1 Remembering**: Identify core principles of physics and chemistry relevant to engineering.
		PI 1.2.2 Understanding: Describe how basic science concepts apply to material behavior and engineering systems.
		PI 1.2.3 Applying: Use scientific laws (e.g., Newton's laws, conservation laws) to solve basic engineering problems
		PI 1.2.4 Analyzing: Examine the interaction between scientific principles in multi-disciplinary engineering systems.
		PI 1.2.5 Evaluating: Critically assess experimental results to determine consistency with scientific theories.
	1.3 Demonstrate competence in **engineering fundamentals**	**PI 1.3.1 Remembering**: List fundamental engineering principles (e.g., Ohm's law, Bernoulli's equation) and their applications.
		PI 1.3.2 Understanding: Explain the relevance of basic engineering principles to real-world problems.
		PI 1.3.3 Applying: Perform calculations and simulations to solve simple engineering tasks.
		PI 1.3.4 Analyzing: Deconstruct engineering scenarios to identify fundamental principles at work.
		PI 1.3.6 Creating: Design a system or solution integrating basic engineering fundamentals to meet specific requirements.
	1.4 Demonstrate competence in **specialized engineering knowledge** to the program	**PI 1.4.1 Remembering**: Identify key concepts and tools in specialized areas such as computer architecture, AI, or network systems.
		PI 1.4.2 Understanding: Explain the functions of specialized engineering systems in the computer engineering domain.
		PI 1.4.3 Applying: Implement domain-specific tools and technologies (e.g., HDL for hardware design, Python for AI).
		PI 1.4.4 Analyzing: Compare and contrast different specialized engineering approaches for solving a given problem.
		PI 1.4.6 Creating: Propose innovative solutions using advanced computer engineering knowledge and tools.

PS: The Programme Outcomes are as mentioned by ABET and adopted by AICTE; Competencies are as mentioned by AICTE and Performance Indicators (PIs) mentioned is a suggestive list by VIT. Faculty members are requested to convey to your HOD & NBA coordinator, competencies under a PO or a PI under a Competency that you find relevant to your course but not included in the suggested list.

PO-Competency-Performance Indicator

PO	Competency	Performance Indicator
PO2 Problem analysis: Identify, formulate, research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences	2.1 Demonstrate an ability **to identify and formulate** complex engineering problem `	**PI 2.1.1 Remembering:** Recall relevant engineering principles, theories, and concepts to identify a problem.
		PI 2.1.2 Understanding: Explain the key features and scope of a complex engineering problem.
		PI 2.1.3 Applying: Use standard problem-identification techniques (e.g., root cause analysis) to define an engineering challenge.
		PI 2.1.4 Analyzing: Decompose a complex engineering problem into its constituent parts to identify critical aspects.
		PI 2.1.5 Evaluating: Assess the relevance and significance of various problem aspects using evidence-based reasoning.
	2.2 Demonstrate an ability to **formulate a solution** plan and methodology for an engineering problem	**PI 2.2.1 Remembering:** List standard methodologies and tools applicable to solving engineering problems.
		PI 2.2.2 Understanding: Describe the steps involved in formulating a solution plan for an engineering problem.
		PI 2.2.3 Applying: Develop a basic solution plan using a systematic approach to solve an identified problem.
		PI 2.2.4 Analyzing: Evaluate various solution methodologies to determine the most effective approach for a given problem.
		PI 2.2.6 Creating: Design a comprehensive and innovative solution plan, integrating multidisciplinary methods if necessary.
	2.3 Demonstrate an ability to **formulate and interpret** a model	**PI 2.3.1 Remembering:** Identify the types of models (e.g., mathematical, physical, computational) used in engineering problem-solving.
		PI 2.3.2 Understanding: Explain the purpose and assumptions of a model in the context of a specific engineering problem.
		PI 2.3.3 Applying: Construct a basic model to represent a complex engineering system or process.
		PI 2.3.4 Analyzing: Evaluate the model's validity by interpreting results and assessing assumptions.
		PI 2.3.6 Creating: Develop a sophisticated model that can simulate real-world engineering scenarios with minimal error.
	2.4 Demonstrate an ability to **execute a solution** process and analyze results	**PI 2.4.1 Remembering:** Recall procedures and tools required for executing an engineering solution process.
		PI 2.4.2 Understanding: Explain the solution process and its relevance to the identified engineering problem.
		PI 2.4.3 Applying: Implement the solution process using appropriate tools, software, or experimental setups.
		PI 2.4.4 Analyzing: Examine the results of the solution process to determine trends, patterns, and inconsistencies.
		PI 2.4.5 Evaluating: Critically assess the solution’s accuracy and efficiency, and propose improvements if necessary.

PS: The Programme Outcomes are as mentioned by ABET and adopted by AICTE; Competencies are as mentioned by AICTE and Performance Indicators (PIs) mentioned is a suggestive list by VIT. Faculty members are requested to convey to your HOD & NBA coordinator, competencies under a PO or a PI under a Competency that you find relevant to your course but not included in the suggested list.

PO-Competency-Performance Indicator

PO	Competency	Performance Indicator
PO3 Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety, and cultural, societal, and environmental considerations.	3.1 Demonstrate an ability to **define** a complex/open-ended problem in engineering terms	**PI 3.1.1 Remembering**: Identify the key requirements, constraints, and context of an open-ended engineering problem.
		PI 3.1.2 Understanding: Explain the problem's scope and the significance of its constraints and requirements.
		PI3.1.3 Applying: Translate real-world challenges into structured engineering problem statements.
		PI 3.1.4 Analyzing: Break down the problem into sub-problems and evaluate its complexity in engineering terms.
		PI 3.1.5 Evaluating: Assess the relevance of the identified constraints and requirements to ensure a well-defined problem.
	3.2 Demonstrate an ability to **generate** a diverse set of alternative design solutions	**PI 3.2.1 Remembering**: List potential design approaches and tools relevant to solving the problem.
		PI 3.2.2 Understanding: Describe the principles and methodologies used to generate alternative design solutions.
		PI 3.2.3 Applying: Propose multiple design concepts addressing the problem's constraints and requirements.
		PI 3.2.4 Analyzing: Evaluate the feasibility, strengths, and weaknesses of alternative design solutions.
		PI 3.2.6 Creating: Develop innovative and diverse design concepts that incorporate multidisciplinary approaches.
	3.3 Demonstrate an ability to **select** optimal design scheme for further development	**PI 3.3.1 Remembering**: Identify evaluation criteria (e.g., cost, safety, sustainability) for comparing design solutions.
		PI 3.3.2 Understanding: Explain the trade-offs involved in selecting a particular design solution.
		PI 3.3.3 Applying: Use decision-making tools (e.g., decision matrices, cost-benefit analysis) to rank alternative designs.
		PI 3.3.4 Analyzing: Compare and contrast design options to determine the most effective solution.
		PI 3.3.5 Evaluating: Justify the selected design scheme based on evidence, stakeholder needs, and design criteria.
	3.4 Demonstrate an ability to **advance** an engineering design to defined end state	**PI 3.4.1 Remembering**: Recall key steps and standards required to advance a design to completion.
		PI 3.4.2. Understanding: Explain how engineering principles and tools are applied during the design development process.
		PI 3.4.3 Applying: Develop detailed engineering designs, including specifications, drawings, or models.
		PI 3.4.4 Analyzing: Evaluate the design's functionality, safety, and performance against specified criteria.
		PI 3.4.6 Creating: Finalize the design solution, incorporating feedback and ensuring compliance with societal, environmental, and ethical considerations.

PS: The Programme Outcomes are as mentioned by ABET and adopted by AICTE; Competencies are as mentioned by AICTE and Performance Indicators (PIs) mentioned is a suggestive list by VIT. Faculty members are requested to convey to your HOD & NBA coordinator, competencies under a PO or a PI under a Competency that you find relevant to your course but not included in the suggested list.

PO-Competency-Performance Indicator

PO	Competency	Performance Indicator
PO4 Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.	4.1 Demonstrate an ability to **conduct** investigations of technical issues consistent with their level of knowledge and understanding	**PI 4.1.1 Remembering**: Identify the technical issues and existing research relevant to a specific problem.
		PI 4.1.2 Understanding: Describe the principles and methods used in investigating technical issues.
		PI 4.1.3 Applying: Carry out systematic investigations to explore a technical problem, using established research methods.
		PI 4.1.4 Analyzing: Break down the problem into components and critically assess the relationships between them.
		PI 4.1.5 Evaluating: Justify the investigation findings based on evidence, logical reasoning, and scientific principles.
	4.2 Demonstrate an ability to **design** experiments to solve open-ended problems	**PI 4.2.1 Remembering**: Recall experimental techniques, tools, and resources needed for designing experiments.
		PI 4.2.2 Understanding: Explain the objectives and constraints of the experiment in relation to the problem being investigated.
		PI 4.2.3 Applying: Develop a detailed experimental plan, including procedures, controls, and variables, to address the problem.
		PI 4.2.4 Analyzing: Critically evaluate the experimental design for potential errors, limitations, and improvements.
		PI 4.2.6 Creating: Design innovative experiments that incorporate advanced techniques or interdisciplinary approaches to solve open-ended problems.
	4.3 Demonstrate an ability to **analyze** data and reach a valid conclusion	**PI 4.3.1 Remembering**: Identify appropriate data analysis techniques for interpreting experimental results.
		PI 4.3.2 Understanding: Explain the trends, patterns, and relationships observed in the data.
		PI 4.3.3 Applying: Perform data analysis using software tools or statistical methods to extract meaningful insights.
		PI 4.3.4 Analyzing: Evaluate the quality, consistency, and reliability of data to identify significant findings.
		PI 4.3.5 Evaluating: Draw conclusions based on data analysis and validate them against hypotheses or research objectives.

PS: The Programme Outcomes are as mentioned by ABET and adopted by AICTE; Competencies are as mentioned by AICTE and Performance Indicators (PIs) mentioned is a suggestive list by VIT. Faculty members are requested to convey to your HOD & NBA coordinator, competencies under a PO or a PI under a Competency that you find relevant to your course but not included in the suggested list.

PO-Competency-Performance Indicator

PO	Competency	Performance Indicator
PO 5: Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.	5.1 Demonstrate an ability **to identify/create** modern engineering tools, techniques and resources	**PI 5.1.1 Remembering**: List commonly used modern engineering and IT tools relevant to computer engineering tasks (e.g., CAD tools, simulation software, programming frameworks).
		PI 5.1.3 Applying: Implement modern tools or techniques to address a specific engineering challenge.
		PI 5.1.6 Creating: Develop or customize a tool, algorithm, or technique to meet the unique requirements of a complex problem.
	5.2 Demonstrate an ability **to select** and apply discipline specific tools, techniques and resources	**PI 5.2.1 Understanding**: Explain the functionality and purpose of various tools available for specific engineering tasks, such as circuit design, simulation, or software development.
		PI 5.2.3 Applying: Use discipline-specific tools (e.g., Verilog for hardware description, Python for AI, MATLAB for simulations) to design or analyze systems.
		PI 5.2.4 Analyzing: Compare different tools and techniques to identify the most effective option for solving a given engineering problem.
	5.3 Demonstrate an ability **to evaluate** the suitability and limitations of tools used to solve an engineering problem	**PI 5.3.2 Understanding**: Articulate the limitations of modern tools and suggest workarounds or complementary methods to overcome them.
		PI 5.3.4 Analyzing: Examine the strengths, weaknesses, and trade-offs of using specific tools for a particular engineering activity.
		PI 5.3.5 Evaluating: Assess the appropriateness of tools for predictive modeling or system design in light of constraints like accuracy, cost, or scalability.

PS: The Programme Outcomes are as mentioned by ABET and adopted by AICTE; Competencies are as mentioned by AICTE and Performance Indicators (PIs) mentioned is a suggestive list by VIT. Faculty members are requested to convey to your HOD & NBA coordinator, competencies under a PO or a PI under a Competency that you find relevant to your course but not included in the suggested list.

PO-Competency-Performance Indicator

PO	Competency	Performance Indicator
PO 6: The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice.	6.1 Demonstrate an ability to **describe** engineering roles in a broader context, e.g. pertaining to the environment, health, safety, legal and public welfare	**PI 6.1.2 Understanding**: Explain the impact of engineering solutions on societal, health, safety, legal, and cultural contexts.
		PI 6.1.5 Evaluating: Assess the ethical and social responsibilities of engineers in addressing public welfare and sustainability issues.
	6.2 Demonstrate an **understanding** of professional engineering regulations, legislation and standards	**PI 6.2.1 Remembering**: Identify key professional engineering codes, standards, and regulations applicable to engineering practice.
		PI 6.2.3 Applying: Use relevant engineering standards or codes to ensure compliance in a specific project or scenario.

PS: The Programme Outcomes are as mentioned by ABET and adopted by AICTE; Competencies are as mentioned by AICTE and Performance Indicators (PIs) mentioned is a suggestive list by VIT. Faculty members are requested to convey to your HOD & NBA coordinator, competencies under a PO or a PI under a Competency that you find relevant to your course but not included in the suggested list.

PO-Competency-Performance Indicator

PO	Competency	Performance Indicator
PO 7: Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and the need for sustainable development.	7.1 Demonstrate an **understanding** of the impact of engineering and industrial practices on social, environmental and in economic contexts	**PI 7.1.1 Identify** risks/impacts in the life-cycle of an engineering product or activity
		PI 7.1.2 Understand the relationship between the technical, socio-economic and environmental dimensions of sustainability
		PI 7.1.5 Evaluating: Assess the trade-offs between economic growth, societal benefits, and environmental sustainability in engineering projects.
	7.4 Demonstrate an ability to **apply** principles of sustainable design and development	**PI 7.2.2 Describe** management techniques for sustainable development
		PI 7.2.3 Apply principles of preventive engineering and sustainable development to an engineering activity or product relevant to the discipline

PS: The Programme Outcomes are as mentioned by ABET and adopted by AICTE; Competencies are as mentioned by AICTE and Performance Indicators (PIs) mentioned is a suggestive list by VIT. Faculty members are requested to convey to your HOD & NBA coordinator, competencies under a PO or a PI under a Competency that you find relevant to your course but not included in the suggested list.

PO-Competency-Performance Indicator

PO	Competency	Performance Indicator
PO 8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.	8.1 Demonstrate an ability to **recognize** ethical dilemmas	**PI 8.1.1 Identify** situations of unethical professional conduct and propose ethical alternatives
		PI 8.1.2 Responding: Engage in discussions on ethical case studies with sensitivity to different viewpoints
		PI 8.1.3 Valuing: Demonstrate willingness to consider ethical consequences over technical or economic gains
	8.2 Demonstrate an ability to **apply** the Code of Ethics	**PI 8.2.1 Identify** tenets of the ASME professional code of ethics
		PI 8.2.2 Responding: Participate actively in ethical review or role-playing exercises.
		PI 8.2.3 Examine and apply moral & ethical principles to known case studies
		PI 8.2.5 Evaluate: Critique a decision or design based on alignment with ethical standards.

PS: The Programme Outcomes are as mentioned by ABET and adopted by AICTE; Competencies are as mentioned by AICTE and Performance Indicators (PIs) mentioned is a suggestive list by VIT. Faculty members are requested to convey to your HOD & NBA coordinator, competencies under a PO or a PI under a Competency that you find relevant to your course but not included in the suggested list.

PO-Competency-Performance Indicator

PO	Competency	Performance Indicator
PO 9: Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.	9.1 Demonstrate an ability **to form** a team and **define** a role for each member	**PI 9.1.1 Remembering**: Recall the essential steps in team formation and the key roles within a team.
		PI 9.1.2 Understanding: Explain the importance of assigning roles based on individual strengths and expertise to optimize team performance.
		PI 9.1.3 Applying: Organize a team for a project, ensuring each member has a clear, defined role aligned with their skills and the project requirements.
		PI 9.1.6 Creating: Develop a team structure and role allocation for complex, multidisciplinary projects, ensuring effective collaboration and task distribution.
	9.2 Demonstrate effective individual and **team operations**-- communication, problem solving, conflict resolution and leadership skills	**PI 9.2.1 Understanding**: Describe the importance of effective communication and conflict resolution within a team.
		PI 9.2.3 Applying: Practice active listening, provide constructive feedback, and contribute to team problem-solving during project work.
		PI 9.2.4 Analyzing: Identify team dynamics, evaluate communication breakdowns, and suggest solutions to improve collaboration.
		PI 9.2.5 Evaluating: Assess individual and team performance based on communication effectiveness, leadership impact, and conflict management in team projects.
	9.3 Demonstrate success in a team-based project	**PI 9.3.2 Understanding**: Recognize the key factors that contribute to the success of a team-based project (e.g., clear objectives, collaboration).
		PI 9.3.3 Applying: Contribute to the successful completion of a project by performing assigned roles and collaborating with team members to meet deadlines.
		PI 9.3.4 Analyzing: Evaluate the success of the project by considering team cohesion, problem-solving approaches, and project outcomes.
		PI 9.3.5 Evaluating: Critically assess the team's overall success and the effectiveness of the collaborative approach, proposing improvements for future team-based projects

PS: The Programme Outcomes are as mentioned by ABET and adopted by AICTE; Competencies are as mentioned by AICTE and Performance Indicators (PIs) mentioned is a suggestive list by VIT. Faculty members are requested to convey to your HOD & NBA coordinator, competencies under a PO or a PI under a Competency that you find relevant to your course but not included in the suggested list.

PO-Competency-Performance Indicator

PO	Competency	Performance Indicator
PO 10: Communication: Communicate effectively on complex engineering activities with the engineering community and with the society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions	10.1 Demonstrate an ability to **comprehend** technical literature and document project work	**PI 10.1.2 Understanding**: Summarize key ideas and technical concepts from engineering papers, manuals, or reports.
		PI 10.1.3 Applying: Write clear, concise, and well-structured project documentation, including technical reports, summaries, and design descriptions.
		PI 10.1.5 Evaluating: Review and critique technical documents for accuracy, clarity, and adherence to standards.
	10.2 Demonstrate **competence** in listening, speaking, and presentation	**PI 10.2.2 Understanding**: Interpret questions, feedback, and suggestions accurately during discussions and presentations.
		PI 10.2.3 Applying: Deliver structured and engaging presentations using appropriate language, visual aids, and examples relevant to engineering topics.
		PI 10.2.5 Evaluating: Reflect on and improve oral communication skills based on peer and instructor feedback.
	10.3 Demonstrate the ability to **integrate** different modes of communication	**PI 10.3.3 Applying**: Combine oral, visual (e.g., slides, diagrams), and written communication effectively in project reports and presentations.
		PI 10.3.4 Analyzing: Tailor communication style and content to suit technical and non-technical audiences.
		PI 10.3.6 Creating: Design multi-modal communication artifacts (e.g., project portfolios, websites) that integrate text, visuals, and technical data cohesively.

PS: The Programme Outcomes are as mentioned by ABET and adopted by AICTE; Competencies are as mentioned by AICTE and Performance Indicators (PIs) mentioned is a suggestive list by VIT. Faculty members are requested to convey to your HOD & NBA coordinator, competencies under a PO or a PI under a Competency that you find relevant to your course but not included in the suggested list.

PO-Competency-Performance Indicator

PO	Competency	Performance Indicator
PO 11: Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's work, as a member and leader in a team, to manage projects and in multidisciplinary environments.	11.1 Demonstrate an ability **to evaluate** the economic and financial performance of an engineering activity	**PI 11.1.1 Remembering**: Recall basic financial terms and concepts related to engineering project management (e.g., cost estimation, budget management).
		PI 11.1.2 Understanding: Explain how financial performance can impact the success of an engineering project, including factors like budgeting and resource allocation.
		PI 11.1.3 Applying: Use tools like cost-benefit analysis or financial modeling to assess the financial performance of a given project.
		PI 11.1.5 Evaluating: Critically assess the economic viability of a project based on financial data, proposing adjustments or improvements as needed.
	11.2 Demonstrate an ability **to compare and contrast** the costs/benefits of alternate proposals for an engineering activity	**PI 11.2.2 Understanding**: Identify the key factors (e.g., cost, benefits, risks) that should be considered when comparing alternative engineering proposals.
		PI 11.2.3 Applying: Use comparison tools (e.g., decision matrix, SWOT analysis) to assess and compare alternative solutions to an engineering problem.
		PI 11.2.4 Analyzing: Evaluate the trade-offs between different engineering proposals by analyzing cost-benefit relationships and their impact on project success.
		PI 11.2.5 Evaluating: Justify the selection of a particular proposal based on a thorough evaluation of costs, benefits, and potential risks.
	11.3 Demonstrate an ability **to plan/manage** an engineering activity within time and budget constraints	**PI 11.3.1 Remembering**: Recall project management concepts such as scheduling, budgeting, and resource allocation.
		PI 11.3.2 Understanding: Explain the relationship between project planning, timeline management, and budget constraints in engineering projects.
		PI 11.3.3 Applying: Use project management tools (e.g., Gantt charts, project scheduling software) to plan and track the progress of an engineering project within the specified budget and timeline.
		PI 11.3.5 Evaluating: Assess the effectiveness of project management strategies and make adjustments to stay within time and budget constraints, ensuring successful project delivery.

PS: The Programme Outcomes are as mentioned by ABET and adopted by AICTE; Competencies are as mentioned by AICTE and Performance Indicators (PIs) mentioned is a suggestive list by VIT. Faculty members are requested to convey to your HOD & NBA coordinator, competencies under a PO or a PI under a Competency that you find relevant to your course but not included in the suggested list.

PO-Competency-Performance Indicator

PO	Competency	Performance Indicator
PO 12: Life-long learning: Recognise the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.	12.1 Demonstrate an ability **to identify** gaps in knowledge and a strategy to close these gaps	**PI 12.1.1** List current areas of technical knowledge relevant to one's discipline.
		PI 12.1.2 Describe the importance of identifying knowledge gaps for professional growth.
		PI 12.1.3 Use self-assessment tools (e.g., checklists, feedback) to identify personal knowledge deficiencies.
		PI 12.1.4 Differentiate between core knowledge and areas needing improvement in a given project or task.
		PI 12.1.5 Critically assess learning methods and tools for their effectiveness in bridging knowledge gaps
		PI 12.1.6 Develop a personalized learning plan to address identified knowledge gaps using appropriate resources.
	12.2 Demonstrate an ability **to identify** changing trends in engineering knowledge and practice	**PI 12.2.1** Recall recent technological developments in the engineering field.
		PI 12.2.2 Explain how evolving technology impacts engineering practices.
		PI 12.2.3 Use trend analysis tools or platforms (e.g., journals, webinars) to monitor changes in the field.
		PI 12.2.4 Examine case studies to detect shifts in engineering solutions over time.
		PI 12.2.5 Assess the relevance and impact of emerging technologies on a specific area of practice.
		PI 12.2.6 Propose strategies to stay updated with evolving engineering trends (e.g., professional memberships, MOOCs).
	12.3 Demonstrate an ability **to identify** and access sources for new information	**PI 12.3.1** List reliable sources of technical and professional information (e.g., IEEE, ASME, research databases).
		PI 12.3.2 Explain the difference between credible and non-credible sources of information.
		PI 12.3.3 Use digital libraries, academic search engines, and databases to gather new information.
		PI 12.3.4 Compare different sources to evaluate the validity and usefulness of information.
		PI 12.3.5 Justify the selection of a particular source for academic or professional use.
		PI 12.3.6 Design a systematic method (e.g., RSS feeds, alerts, citation managers) for continuous information gathering.

PS: The Programme Outcomes are as mentioned by ABET and adopted by AICTE; Competencies are as mentioned by AICTE and Performance Indicators (PIs) mentioned is a suggestive list by VIT. Faculty members are requested to convey to your HOD & NBA coordinator, competencies under a PO or a PI under a Competency that you find relevant to your course but not included in the suggested list.
